The Process Data Historian

Real-time process historians are excellent tools collect data for trending and performance analysis. Here are few things to consider when selecting.

Process Historians connect to real-time data systems, store data, and make it available to report software tools.

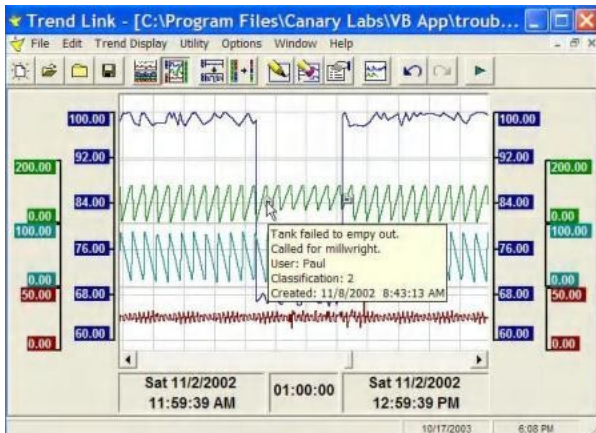

Why **Demand** OPC compliant historians?

Key items to consider about data storage:

1. Does the historian save real values or does it put the data back together when it is called?
2. Does the historian use compression?
3. Does the historian have an easy configuration tool to add tags into storage?
4. You have to measure the historian performance through testing. A trial will only showcase the user tool.
5. Make sure your historian uses OPC-DA connectors to data and OPC-HDA connectors to trending and reporting tools?

Partial List of User tools for OPC-HDA compliant Historians:

- **TrakSYS™** Real-time performance system
- **Incuity EMI** Incuity EMI is a manufacturing intelligence portal.
- **TrendLink** Easy and Intuitive the Canary Labs trending package
- **Canary InfoLink** Web based trending, graphics and reports by Canary Labs.
- **Trend Web** by Canary Labs
- **Trend Reporter** by Canary Labs
- **TrendCalc** by Canary Labs
- **XL Reporter** SyTech's Excel™ based reporting
- **TrendWorX™** Iconics' graphical trending package
- **Pocket TrendWorX™** Iconics' graphical trending package for mobile devices.
- **PortalWorX™** by Iconics
- **ReportWorX™** by Iconics
- **MatrikonOPC Trender**
- **Alarm Management System™ LogMate™** from TiPS Incorporated.
- **Oxalis:** Trend tool from Bee Computing – also available as free download
- **Status Vision Designer®** from Mobiform Software Inc.
- **ExperTune®** Loop tuning software
- **SAP xMII** manufacturing intelligence solution
- **Sapphire Trend** by Jemmac Software
- **DataPARC** trending and reporting by Capstone Technology Corporation
- **CitectSCADA Reports** by Citect
- **OPCWareXL** Excel™ reporting by OPCWare.
- **Dream Report** by Ocean Data Systems
